[Optional] Formal Letter of Support / Additional Notes:

RE: Letter of Support for Application to Campus Sustainability Fund

I am pleased to provide this letter of support for the proposal to revitalize the Community Design Building courtyard in west Campus. I have consulted with Nicole Loeffler-Gladstone and Emma DeBoer, two of our graduate students, on the development of their proposal and feel confident that they are committed to the success of the project. The project will revitalize a space that was originally designed and built as part of our department's Design Build program. It is great to see renewed interest in a space that has become neglected and underused. In addition to my support, I have confirmed permission from the College of Built Environments for the project. The funding for this project by the CSF is critical as neither the Department of Landscape Architecture nor the College have available funding at this time. In addition to the benefits to the College and larger UW community, this project will provide real world experience for Nicole and Emma and fully contribute to their learning. To that end, I have agreed to advise them over the next two years in terms of design, implementation, and monitoring of impacts of the project.

I have no doubt that Nicole and Emma will be excellent ambassadors for the Campus Sustainability Fund and UW and will maximize the educational and community benefits afforded to them by the project.
