

Harborview Medical Center is a comprehensive healthcare facility dedicated to providing specialized care for a broad spectrum of patients from throughout the Pacific Northwest, including the most vulnerable residents of King County.

As the only designated Level I adult and pediatric trauma and verified burn center in the State of Washington, Harborview serves as the regional trauma and burn referral center for Alaska, Montana and Idaho and the disaster preparedness and disaster control hospital for Seattle and King County.

The Harborview volunteer team supports the hospital's mission by offering exemplary customer service, departmental support, and general comfort to patients, visitors, and staff.

Project Link members have joined our volunteer team to offer great care and assistance to diverse populations, including those who may not speak English as a first language. Project Link volunteers can offer conversation and nonmedical communication to patients and visitors in need of assistance or the comfort found in one's home language. These multilingual volunteers are easily identifiable by an ID badge sticker advertising languages spoken other than English. Project Link volunteers have enriched the volunteer program with language skills, good work, and great empathy.
